## T.RowePrice®

## ANNUAL REPORT

December 31, 2018

RPBAX	t. Rowe price Balanced Fund
RBAIX	Balanced Fund-I Class
	For more insights from T. Rowe Price investment
	professionals, go to <b>troweprice.com</b> .

Beginning on January 1, 2021, as permitted by SEC regulations, paper copies of the T. Rowe Price funds' annual and semiannual shareholder reports will no longer be mailed, unless you specifically request them. Instead, shareholder reports will be made available on the funds' website (**troweprice.com/prospectus**), and you will be notified by mail with a website link to access the reports each time a report is posted to the site.

If you already elected to receive reports electronically, you will not be affected by this change and need not take any action. At any time, shareholders who invest directly in T. Rowe Price funds may generally elect to receive reports or other communications electronically by enrolling at **troweprice.com/paperless** or, if you are a retirement plan sponsor or invest in the funds through a financial intermediary (such as an investment advisor, broker-dealer, insurance company, or bank), by contacting your representative or your financial intermediary.

You may elect to continue receiving paper copies of future shareholder reports free of charge. To do so, if you invest directly with T. Rowe Price, please call T. Rowe Price as follows: IRA, nonretirement account holders, and institutional investors, **1-800-225-5132**; small business retirement accounts, **1-800-492-7670**. If you are a retirement plan sponsor or invest in the T. Rowe Price funds through a financial intermediary, please contact your representative or financial intermediary or follow additional instructions if included with this document. Your election to receive paper copies of reports will apply to all funds held in your account with your financial intermediary or, if you invest directly in the T. Rowe Price. Your election can be changed at any time in the future.

#### HIGHLIGHTS

- The Balanced Fund declined in the 12 months ended December 31, 2018, and underperformed its combined index portfolio, as well as its Lipper and Morningstar benchmarks.
- Market volatility was elevated throughout 2018. Global equities pulled back as global trade tensions, slowing growth, and political uncertainty weighed on various markets, while rising interest rates tempered returns in U.S. fixed income markets.
- We took advantage of more attractive valuations following the equity market sell-off that began in early October to adjust our allocations in several segments. Near the end of our reporting period, we reduced our underweight to equities to neutral and moved to an overweight in U.S. growth stocks.
- We seek value in segments where we feel that market weakness has created attractive risk/reward opportunities. Near-term risks to global markets include repercussions from potential monetary policy missteps and an escalation in trade tensions.

# Go Paperless

Sign up for e-delivery of your statements, confirmations, and prospectuses or shareholder reports.

#### $(\rightarrow)$ TO ENROLL:

If you invest directly with T. Rowe Price, go to **troweprice.com/paperless**.

If you invest through an investment advisor, a bank, or a brokerage firm, please contact that organization and ask if it can provide electronic documentation. **It's fast**—receive your statements and confirmations faster than U.S. mail.

It's convenient—access your important account documents whenever you need them.

It's secure—we protect your online accounts using "True Identity" to confirm new accounts and make verification faster and more secure.

It can save you money—where applicable, T. Rowe Price passes on the cost savings to fund holders.\*

\*Certain mutual fund accounts that are assessed an annual account service fee can also save money by switching to e-delivery.

**CIO Market Commentary** 

## Dear Shareholder

The year 2018 was not one that investors will remember fondly. The major stock indexes recorded their worst declines in a decade, with most falling over 20% from recent peaks and bringing a technical end to the bull market that began in 2009. In direct contrast to 2017, financial assets performed poorly across asset classes and geographies. The broadest measure of domestic bond returns, the Bloomberg Barclays U.S. Aggregate Bond Index, returned exactly nothing (0.0%) for the year, and nearly all overseas bond and equity markets also performed poorly. "Cash was king," in Wall Street parlance, which never makes for a happy reign.

Many issues were behind the market weakness, but we can point to four primary factors that weighed on sentiment:

*Rising interest rates.* Wage pressures appeared to be accelerating early in the year, sending longer-term bond yields to multiyear highs and sparking a sell-off in equities in early February. Wage gains soon moderated, but a continued decline in the unemployment rate—which reached a five-decade low of 3.7% in September—kept investors on the lookout for higher inflation ahead. In October, yields returned to their peaks on the back of good economic data and suggestions from Federal Reserve officials that they might keep hiking interest rates more quickly than expected. This was subsequently followed by a decline in long-term rates as investors sought safety late in the year and questioned the pace of future interest rate hikes.

*Trade tensions.* On March 1, President Donald Trump took markets by surprise in announcing a new series of metal tariffs. His administration quickly adopted a decidedly protectionist stance, with pro-trade advocates leaving and the announcement of plans for a range of new trade restrictions. Many threats never materialized, and the White House announced a renegotiated trade deal with Canada and Mexico. Trade tensions with China only appeared to deepen as the year progressed, however.

*Slowing global growth.* A global slowdown became apparent in the second half of 2018. Environmental and financial reforms put the brakes on the Chinese economy, as planned, but trade frictions caused growth to slow below official targets. Other emerging markets suffered from a stronger U.S. dollar and higher U.S. interest rates. In Europe, trade worries also hampered business spending, while unresolved Brexit fears and further threats to the eurozone from Italy and elsewhere also took a toll. Plummeting oil prices late in the year seemed to confirm a general weakening in global economic conditions.

*Peaking fundamentals.* The U.S. economy stood apart by accelerating in 2018, but a moderation in 2019 appears all but inevitable as the effects of fiscal stimulus moderate. Of specific concern to investors is the almost certain slowdown in corporate profits in the coming year. Overall profits for the S&P 500 grew by 25% versus the year before in the first three quarters of 2018—a pace sure to slow as the year-over-year impact of the tax cut fades, wage gains pressure margins, and the global economy cools.

The market's dramatic pullback in the final weeks of 2018—stocks suffered their worst December since the Great Depression—seemed to reflect fears that a recession might even be imminent. I think such concerns are overblown. The Fed has already completed most of its planned rate hikes, promising less of a headwind for the economy and markets. China and Europe are likely to respond to slowing growth with stimulus, and both will benefit from lower oil prices. As I write, some encouraging signs have also emerged on the trade front, although whether the U.S. and China can resolve their differences remains perhaps the largest uncertainty facing markets.

In terms of stock performance, the painful end to 2018 served to improve valuations, making gains in the coming year less of a hurdle. I would also note that a further stock market "bust" in 2019 seems unlikely given that we never experienced the concentrated "boom" that has preceded past bad bear markets. In the final stages of the dot-com boom of the late 1990s, for example, investors flooded in to telecom shares, and huge amounts of capital and risk flowed in to housing in the mid-2000s. Currently, I simply do not see those sorts of distortions in the financial system.

Of course, opinions about what 2019 holds vary among our investment professionals at T. Rowe Price, and we sharpen each other's thinking by constantly sharing opinions and insights. Please rest assured that your fund's manager is drawing on the insights and perspectives across our global organization as he or she charts the course ahead.

Thank you for your continued confidence in T. Rowe Price.

Sincerely,

Robert fr. Shanfor

Robert Sharps Group Chief Investment Officer

#### **INVESTMENT OBJECTIVE**

The fund seeks to provide capital growth, current income, and preservation of capital through a portfolio of stocks and fixed income securities.

#### **FUND COMMENTARY**

#### How did the fund perform in the past 12 months?

The Balanced Fund returned -4.92% in the 12 months ended December 31, 2018. The fund lagged its combined index portfolio, which is a custom benchmark comprising multiple indexes that represent the asset classes in which the fund invests, and its Lipper and Morningstar benchmarks.

#### PERFORMANCE COMPARISON

	Total Return		
Periods Ended 12/31/18	6 Months	12 Months	
Balanced Fund	-5.79%	-4.92%	
Balanced Fund-I Class	-5.75	-4.85	
Morningstar Moderate Target Risk Index	-4.46	-4.76	
Combined Index Portfolio*	-4.66	-4.42	
Lipper Balanced Funds Inde	x -4.81	-4.68	

\*For a definition of the combined index portfolio, please see the Benchmark Information section.

(Returns for I Class shares varied slightly, reflecting a different fee structure. *Past performance cannot guarantee future results.*)

# What factors influenced the fund's performance?

Security selection detracted the most for the period, most notably underperformance in our international and U.S. large-cap value equities. U.S. investment-grade bonds also trailed their benchmark and weighed on relative results as

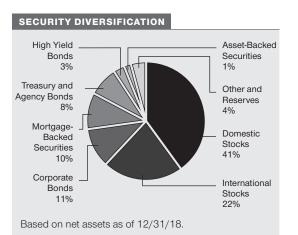

returns were hampered by rising interest rates. In contrast, strong performance by stocks in the information technology sector helped the U.S. large-cap growth allocation outpace its benchmark and contribute to relative performance. The allocation generated positive returns in a year where most equity indexes posted losses.

The inclusion of non-benchmark sectors hurt relative performance. Exposure to real assets stocks detracted, although a tactical underweight allocation to the sector partially offset the negative impact. Real assets equities underperformed global equities as slowing Chinese economic growth weighed on commodity prices. Further, crude oil prices rose to four-year highs in October then plunged into bear market territory amid global oversupply fears. High yield bonds also struggled due, in part, to heightened risk aversion and weakness in the energy sector, which represents a considerable portion of the high yield universe.

The impact of tactical allocation decisions to overweight or underweight various asset classes versus the fund's combined index portfolio benchmark was neutral. In addition to an underweight to the challenged real assets sector, an overweight to fixed income securities during a period of volatile equity markets proved favorable. These positive contributions were, however, countered by an overweight allocation to international equities, which lagged U.S. equities. Escalating trade tensions, political uncertainty in several European countries, and slowing economic growth dragged down equities in developed non-U.S. markets. International markets fared better than U.S. markets during the bout of volatility late in the reporting period, but the positive impact was not enough to offset underperformance for most of the year.

#### How is the fund positioned?

We reduced our underweight to equities and are now neutral relative to fixed income securities, as equity valuations now better reflect geopolitical risks and concerns over an aging economic cycle. Expected returns from bonds remain

modest, although yields have fallen from recent highs amid the equity market sell-off and speculation of a more dovish Federal Reserve.

#### Stocks

On a regional basis, we reduced our underweight to U.S. equities. Market weakness late in the period resulted in more attractive valuations, and while earnings growth in the U.S. has likely peaked, it is still constructive. We favor U.S.

growth stocks, which we believe are more reasonably priced after the recent downturn. Secular growth stocks tend to be more defensive in a low-growth environment, while value stocks in various sectors face headwinds from moderating growth, the late-stage credit cycle, a flattening Treasury yield curve, and low energy prices.

#### BOND PORTFOLIO PROFILE

Periods Ended	6/30/18	12/31/18
Weighted Average Effective Duration (years)	5.8	5.8
Weighted Average Maturity (years)	7.9	8.3

- \*Sources: Moody's Investors Service; if Moody's does not rate a security, then Standard & Poor's (S&P) is used as a secondary source. When available, T. Rowe Price will use Fitch for securities that are not rated by Moody's or S&P. T. Rowe Price does not evaluate these ratings but simply assigns them to the appropriate credit quality category as determined by the rating agency.
- \*\*U.S. government agency securities are issued or guaranteed by a U.S. government agency and may include conventional pass-through securities and collateralized mortgage obligations; unlike Treasuries, government agency securities are not issued directly by the U.S. government and are generally unrated but may have credit support from the U.S. Treasury (e.g., FHLMC and FNMA issues) or a direct government guarantee (e.g., GNMA issues). Therefore, this category may include rated and unrated securities.
- \* \*\* U.S. Treasury securities are issued by the U.S. Treasury and are backed by the full faith and credit of the U.S. government. The ratings of U.S. Treasury securities are derived from the ratings on the U.S. government.

We trimmed our overweight to international stocks. Growth expectations have moderated, and rising trade tensions and political uncertaintyincluding Brexit—could pose significant risk to markets. Japanese equities remain supported by better relative valuations, although their dependence on global trade could be problematic as global growth momentum fades and trade tensions remain.

We continue to underweight inflation-sensitive real assets equities because we expect global growth to slow in the near term and that longerterm imbalances between energy supply and demand will persist.

#### Bonds

We are currently underweight to high yield bonds, although we added to our position after the late-year sell-off made their valuations more appealing. Despite the late stage of the credit cycle, we believe that high yield bonds present attractive opportunities supported by positive corporate fundamentals and low default expectations.

#### What is portfolio management's outlook?

After 2017's synchronized upswing in global economic activity, growth trajectories worldwide diverged in 2018. Fiscal stimulus and the late-2017 tax overhaul package benefited the U.S. economy, while growth began to waver in a few other markets despite support from long-standing accommodative monetary policies. We expect that the growth differential between the U.S. and the rest of the world will narrow as the tailwind from U.S. fiscal stimulus starts to fade. Growth in Europe moderated, but it will stabilize near potential growth levels. The stronger U.S. dollar and global trade strife have exacerbated economic imbalances in some emerging markets; however, many developing countries rely less on U.S. dollar funding than they have in the past, lessening the potential for systemic risk. Recent energy price declines should be supportive of more consumer-oriented emerging markets but may prove to be a headwind for their commodity export-dependent peers.

We seek investment opportunities, particularly in instances where fundamental value may not be fully reflected in market prices. Global central banks are in varying stages of winding down accommodative monetary policies, leading to a decrease in global liquidity and the potential for upward pressure on yields. Still, fundamentals for corporate earnings remain broadly supportive in our view, and we do not anticipate a U.S. recession over the next year. Near-term risks to global markets include repercussions from potential monetary policy missteps and an escalation in trade tensions.

With rising geopolitical and monetary policy risks, and higher volatility, we have a balanced view on risk-taking within our portfolios. We have, however, selectively added to our positions where we feel that market weakness has created attractive opportunities. Given the many crosscurrents that can influence global financial markets, we believe that over the long term, the Balanced Fund's broad diversification across asset classes, investment styles, and geography, combined with strengths in our strategic investing approach, will help us generate attractive risk-adjusted returns across market environments.

The views expressed reflect the opinions of T. Rowe Price as of the date of this report and are subject to change based on changes in market, economic, or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

#### **RISKS OF INVESTING IN STOCKS**

As with all stock mutual funds, the fund's share price can fall because of weakness in the stock market, a particular industry, or specific holdings. Stock markets can decline for many reasons, including adverse political or economic developments, changes in investor psychology, or heavy institutional selling. The prospects for an industry or company may deteriorate because of a variety of factors, including disappointing earnings or changes in the competitive environment. In addition, the investment manager's assessment of companies held in a fund may prove incorrect, resulting in losses or poor performance even in rising markets.

#### **RISKS OF INTERNATIONAL INVESTING**

Funds that invest overseas generally carry more risk than funds that invest strictly in U.S. assets. Risks can result from varying stages of economic and political development; differing regulatory environments, trading days, and accounting standards; currency fluctuations; and higher transaction costs of non-U.S. markets. Investments outside the United States could be subject to governmental actions such as capital or currency controls, nationalization of a company or industry, expropriation of assets, or imposition of high taxes.

#### **RISKS OF INVESTING IN BONDS**

Funds that invest in bonds are subject to interest rate risk, the decline in bond prices that usually accompanies a rise in interest rates. Longer-maturity bonds typically decline more than those with shorter maturities. Funds that invest in bonds are also subject to credit risk, the chance that any fund holding could have its credit rating downgraded or that a bond issuer will default (fail to make timely payments of interest or principal), potentially reducing the fund's income level and share price.

#### **BENCHMARK INFORMATION**

**Combined index portfolio:** An unmanaged portfolio of 45.5% domestic stocks (S&P 500 Index), 35.0% bonds (Bloomberg Barclays U.S. Aggregate Bond Index), and 19.5% international stocks (MSCI EAFE Index).

#### **GROWTH OF \$10,000**

This chart shows the value of a hypothetical \$10,000 investment in the fund over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with benchmarks, which include a broad-based market index and may also include a peer group average or index. Market indexes do not include expenses, which are deducted from fund returns as well as mutual fund averages and indexes.

#### BALANCED FUND

Note: Performance for the I Class will vary due to its differing fee structure.

--- Linked Performance Benchmark\*

\*The linked performance benchmark reflects the performance of the Merrill Lynch-Wilshire Capital Market Index through 6/30/09 and the performance of the Morningstar Moderate Target Risk Index from 7/1/09 through the end of the period.

20.926

#### AVERAGE ANNUAL COMPOUND TOTAL RETURN

Periods Ended 12/31/18	1 Year	5 Years	10 Years	Since Inception	Inception Date
Balanced Fund	-4.92%	4.85%	9.63%	-	-
Balanced Fund-I Class	-4.85	-	-	6.06%	12/17/15

The fund's performance information represents only past performance and is not necessarily an indication of future results. Current performance may be lower or higher than the performance data cited. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. For the most recent month-end performance, please visit our website (troweprice.com) or contact a T. Rowe Price representative at 1-800-225-5132 or, for I Class shares, 1-800-638-8790.

This table shows how the fund would have performed each year if its actual (or cumulative) returns for the periods shown had been earned at a constant rate. Average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions. Returns do not reflect taxes that the shareholder may pay on fund distributions or the redemption of fund shares. When assessing performance, investors should consider both short- and long-term returns.

#### EXPENSE RATIO

Balanced Fund	0.64%
Balanced Fund-I Class	0.49

The expense ratio shown is as of the fund's fiscal year ended 12/31/17. This number may vary from the expense ratio shown elsewhere in this report because it is based on a different time period and, if applicable, includes acquired fund fees and expenses but does not include fee or expense waivers.

#### FUND EXPENSE EXAMPLE

As a mutual fund shareholder, you may incur two types of costs: (1) transaction costs, such as redemption fees or sales loads, and (2) ongoing costs, including management fees, distribution and service (12b-1) fees, and other fund expenses. The following example is intended to help you understand your ongoing costs (in dollars) of investing in the fund and to compare these costs with the ongoing costs of investing in other mutual funds. The example is based on an investment of \$1,000 invested at the beginning of the most recent six-month period and held for the entire period.

Please note that the fund has two share classes: The original share class (Investor Class) charges no distribution and service (12b-1) fee, and the I Class shares are also available to institutionally oriented clients and impose no 12b-1 or administrative fee payment. Each share class is presented separately in the table.

#### Actual Expenses

The first line of the following table (Actual) provides information about actual account values and expenses based on the fund's actual returns. You may use the information on this line, together with your account balance, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number on the first line under the heading "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### Hypothetical Example for Comparison Purposes

The information on the second line of the table (Hypothetical) is based on hypothetical account values and expenses derived from the fund's actual expense ratio and an assumed 5% per year rate of return before expenses (not the fund's actual return). You may compare the ongoing costs of investing in the fund with other funds by contrasting this 5% hypothetical example and the 5% hypothetical examples that appear in the shareholder reports of the other funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

#### FUND EXPENSE EXAMPLE (CONTINUED)

**Note:** T. Rowe Price charges an annual account service fee of \$20, generally for accounts with less than \$10,000. The fee is waived for any investor whose T. Rowe Price mutual fund accounts total \$50,000 or more; accounts electing to receive electronic delivery of account statements, transaction confirmations, prospectuses, and shareholder reports; or accounts of an investor who is a T. Rowe Price Personal Services or Enhanced Personal Services client (enrollment in these programs generally requires T. Rowe Price assets of at least \$250,000). This fee is not included in the accompanying table. If you are subject to the fee, keep it in mind when you are estimating the ongoing expenses of investing in the fund and when comparing the expenses of this fund with other funds.

You should also be aware that the expenses shown in the table highlight only your ongoing costs and do not reflect any transaction costs, such as redemption fees or sales loads. Therefore, the second line of the table is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds. To the extent a fund charges transaction costs, however, the total cost of owning that fund is higher.

#### BALANCED FUND

	Beginning Account Value 7/1/18	Ending Account Value 12/31/18	Expenses Paid During Period* 7/1/18 to 12/31/18
Investor Class			
Actual	\$1,000.00	\$942.10	\$2.69
Hypothetical (assumes 5%	, D		
return before expenses)	1,000.00	1,022.43	2.80
I Class			
Actual	1,000.00	942.50	2.11
Hypothetical (assumes 5%	5		
return before expenses)	1,000.00	1,023.04	2.19

\*Expenses are equal to the fund's annualized expense ratio for the 6-month period, multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half year (184), and divided by the days in the year (365) to reflect the half-year period. The annualized expense ratio of the Investor Class was 0.55%, and the I Class was 0.43%.

#### AFFILIATED COMPANIES

#### (\$000s)

The fund may invest in certain securities that are considered affiliated companies. As defined by the 1940 Act, an affiliated company is one in which the fund owns 5% or more of the outstanding voting securities, or a company that is under common ownership or control. The following securities were considered affiliated companies for all or some portion of the year ended December 31, 2018. Net realized gain (loss), investment income, change in net unrealized gain/loss, and purchase and sales cost reflect all activity for the period then ended.

#### NOTES TO FINANCIAL STATEMENTS

T. Rowe Price Balanced Fund, Inc. (the fund) is registered under the Investment Company Act of 1940 (the 1940 Act) as a diversified, open-end management investment company. The fund seeks to provide capital growth, current income, and preservation of capital through a portfolio of stocks and fixed-income securities. The fund has two classes of shares: the Balanced Fund (Investor Class) and the Balanced Fund–I Class (I Class). I Class shares generally are available only to investors meeting a \$1,000,000 minimum investment, although the minimum is generally waived for certain client accounts. Each class has exclusive voting rights on matters related solely to that class; separate voting rights on matters that relate to both classes; and, in all other respects, the same rights and obligations as the other class.

#### **NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES**

**Basis of Preparation** The fund is an investment company and follows accounting and reporting guidance in the Financial Accounting Standards Board (FASB) *Accounting Standards Codification* Topic 946 (ASC 946). The accompanying financial statements were prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), including, but not limited to, ASC 946. GAAP requires the use of estimates made by management. Management believes that estimates and valuations are appropriate; however, actual results may differ from those estimates, and the valuations reflected in the accompanying financial statements may differ from the value ultimately realized upon sale or maturity. Certain ratios in the accompanying Financial Highlights have been included to conform to the current year presentation.

Investment Transactions, Investment Income, and Distributions Investment transactions are accounted for on the trade date basis. Income and expenses are recorded on the accrual basis. Realized gains and losses are reported on the identified cost basis. Premiums and discounts on debt securities are amortized for financial reporting purposes. Paydown gains and losses are recorded as an adjustment to interest income. Income tax-related interest and penalties, if incurred, are recorded as income tax expense. Dividends received from mutual fund investments are reflected as dividend income; capital gain distributions are reflected as realized gain/loss. Dividend income and capital gain distributions are recorded on the ex-dividend date. Distributions from REITs are initially recorded as dividend income and, to the extent such represent a return of capital or capital gain for tax purposes, are reclassified when such information becomes available. Distributions to shareholders are recorded on the ex-dividend date. Income distributions, if any, are declared and paid by each class quarterly. A capital gain distribution may also be declared and paid by the fund annually.

**Currency Translation** Assets, including investments, and liabilities denominated in foreign currencies are translated into U.S. dollar values each day at the prevailing exchange rate, using the mean of the bid and asked prices of such currencies against U.S. dollars as quoted by a major bank. Purchases and sales of securities, income, and expenses are translated into U.S. dollars at the prevailing exchange rate on the respective date of such transaction. The effect of changes in foreign currency exchange rates on realized and unrealized security gains and losses is not bifurcated from the portion attributable to changes in market prices.

**Class Accounting** Shareholder servicing, prospectus, and shareholder report expenses incurred by each class are charged directly to the class to which they relate. Expenses common to both classes and investment income are allocated to the classes based upon the relative daily net assets of each class's settled shares; realized and unrealized gains and losses are allocated based upon the relative daily net assets of each class's outstanding shares. To the extent any expenses are waived or reimbursed in accordance with an expense limitation (see Note 6), the waiver or reimbursement is charged to the applicable class or allocated across the classes in the same manner as the related expense.

**Rebates** Subject to best execution, the fund may direct certain security trades to brokers who have agreed to rebate a portion of the related brokerage commission to the fund in cash. Commission rebates are reflected as realized gain on securities in the accompanying financial statements and totaled \$2,000 for the year ended December 31, 2018.

**New Accounting Guidance** In March 2017, the FASB issued amended guidance to shorten the amortization period for certain callable debt securities held at a premium. The guidance is effective for fiscal years and interim periods beginning after December 15, 2018. Adoption will have no effect on the fund's net assets or results of operations.

**Indemnification** In the normal course of business, the fund may provide indemnification in connection with its officers and directors, service providers, and/or private company investments. The fund's maximum exposure under these arrangements is unknown; however, the risk of material loss is currently considered to be remote.

#### NOTE 2 - VALUATION

The fund's financial instruments are valued and each class's net asset value (NAV) per share is computed at the close of the New York Stock Exchange (NYSE), normally 4 p.m. ET, each day the NYSE is open for business. However, the NAV per share may be calculated at a time other than the normal close of the NYSE if trading on the NYSE is restricted, if the NYSE closes earlier, or as may be permitted by the SEC.

Fair Value The fund's financial instruments are reported at fair value, which GAAP defines as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The T. Rowe Price Valuation Committee (the Valuation Committee) is an internal committee that has been delegated certain responsibilities by the fund's Board of Directors (the Board) to ensure that financial instruments are appropriately priced at fair value in accordance with GAAP and the 1940 Act. Subject to oversight by the Board, the Valuation Committee develops and oversees pricing-related policies and procedures and approves all fair value determinations. Specifically, the Valuation Committee establishes procedures to value securities; determines pricing techniques, sources, and performance of pricing vendors; oversees valuation-related business continuity practices; and provides guidance on internal controls and valuation-related matters. The Valuation Committee reports to the Board and has representation from legal, portfolio management and trading, operations, risk management, and the fund's treasurer.

Various valuation techniques and inputs are used to determine the fair value of financial instruments. GAAP establishes the following fair value hierarchy that categorizes the inputs used to measure fair value:

- Level 1 quoted prices (unadjusted) in active markets for identical financial instruments that the fund can access at the reporting date
- Level 2 inputs other than Level 1 quoted prices that are observable, either directly or indirectly (including, but not limited to, quoted prices for similar financial instruments in active markets, quoted prices for identical or similar financial instruments in inactive markets, interest rates and yield curves, implied volatilities, and credit spreads)

Level 3 - unobservable inputs

Observable inputs are developed using market data, such as publicly available information about actual events or transactions, and reflect the assumptions that market participants would use to price the financial instrument. Unobservable inputs are those for which market data are not available and are developed using the best information available about the assumptions that market participants would use to price the financial instrument. GAAP requires valuation techniques to maximize the use of relevant observable inputs and minimize the use of unobservable inputs. When multiple inputs are used to derive fair value, the financial instrument is assigned to the level within the fair value hierarchy based on the lowest-level input that is significant to the fair value

of the financial instrument. Input levels are not necessarily an indication of the risk or liquidity associated with financial instruments at that level but rather the degree of judgment used in determining those values.

**Valuation Techniques** Equity securities listed or regularly traded on a securities exchange or in the over-the-counter (OTC) market are valued at the last quoted sale price or, for certain markets, the official closing price at the time the valuations are made. OTC Bulletin Board securities are valued at the mean of the closing bid and asked prices. A security that is listed or traded on more than one exchange is valued at the quotation on the exchange determined to be the primary market for such security. Listed securities not traded on a particular day are valued at the mean of the closing bid and asked prices for domestic securities and the last quoted sale or closing price for international securities.

For valuation purposes, the last quoted prices of non-U.S. equity securities may be adjusted to reflect the fair value of such securities at the close of the NYSE. If the fund determines that developments between the close of a foreign market and the close of the NYSE will affect the value of some or all of its portfolio securities, the fund will adjust the previous quoted prices to reflect what it believes to be the fair value of the securities as of the close of the NYSE. In deciding whether it is necessary to adjust quoted prices to reflect fair value, the fund reviews a variety of factors, including developments in foreign markets, the performance of U.S. securities markets, and the performance of instruments trading in U.S. markets that represent foreign securities and baskets of foreign securities. The fund may also fair value securities in other situations, such as when a particular foreign market is closed but the fund is open. The fund uses outside pricing services to provide it with quoted prices and information to evaluate or adjust those prices. The fund cannot predict how often it will use quoted prices and how often it will determine it necessary to adjust those prices to reflect fair value. As a means of evaluating its security valuation process, the fund routinely compares quoted prices, the next day's opening prices in the same markets, and adjusted prices.

Actively traded equity securities listed on a domestic exchange generally are categorized in Level 1 of the fair value hierarchy. Non-U.S. equity securities generally are categorized in Level 2 of the fair value hierarchy despite the availability of quoted prices because, as described above, the fund evaluates and determines whether those quoted prices reflect fair value at the close of the NYSE or require adjustment. OTC Bulletin Board securities, certain preferred securities, and equity securities traded in inactive markets generally are categorized in Level 2 of the fair value hierarchy.

Debt securities generally are traded in the over-the-counter (OTC) market and are valued at prices furnished by dealers who make markets in such securities or by an independent pricing service, which considers the yield or price of bonds of comparable

quality, coupon, maturity, and type, as well as prices quoted by dealers who make markets in such securities. Generally, debt securities are categorized in Level 2 of the fair value hierarchy; however, to the extent the valuations include significant unobservable inputs, the securities would be categorized in Level 3.

Investments in mutual funds are valued at the mutual fund's closing NAV per share on the day of valuation and are categorized in Level 1 of the fair value hierarchy. Financial futures contracts are valued at closing settlement prices and are categorized in Level 1 of the fair value hierarchy. Assets and liabilities other than financial instruments, including short-term receivables and payables, are carried at cost, or estimated realizable value, if less, which approximates fair value.

Thinly traded financial instruments and those for which the above valuation procedures are inappropriate or are deemed not to reflect fair value are stated at fair value as determined in good faith by the Valuation Committee. The objective of any fair value pricing determination is to arrive at a price that could reasonably be expected from a current sale. Financial instruments fair valued by the Valuation Committee are primarily private placements, restricted securities, warrants, rights, and other securities that are not publicly traded.

Subject to oversight by the Board, the Valuation Committee regularly makes good faith judgments to establish and adjust the fair valuations of certain securities as events occur and circumstances warrant. For instance, in determining the fair value of an equity investment with limited market activity, such as a private placement or a thinly traded public company stock, the Valuation Committee considers a variety of factors, which may include, but are not limited to, the issuer's business prospects, its financial standing and performance, recent investment transactions in the issuer, new rounds of financing, negotiated transactions of significant size between other investors in the company, relevant market valuations of peer companies, strategic events affecting the company, market liquidity for the issuer, and general economic conditions and events. In consultation with the investment and pricing teams, the Valuation Committee will determine an appropriate valuation technique based on available information, which may include both observable and unobservable inputs. The Valuation Committee typically will afford greatest weight to actual prices in arm's length transactions, to the extent they represent orderly transactions between market participants; transaction information can be reliably obtained, and prices are deemed representative of fair value. However, the Valuation Committee may also consider other valuation methods such as market-based valuation multiples; a discount or premium from market value of a similar, freely traded security of the same issuer; or some combination. Fair value determinations are reviewed

on a regular basis and updated as information becomes available, including actual purchase and sale transactions of the issue. Because any fair value determination involves a significant amount of judgment, there is a degree of subjectivity inherent in such pricing decisions, and fair value prices determined by the Valuation Committee could differ from those of other market participants. Depending on the relative significance of unobservable inputs, including the valuation technique(s) used, fair valued securities may be categorized in Level 2 or 3 of the fair value hierarchy.

**Valuation Inputs** The following table summarizes the fund's financial instruments, based on the inputs used to determine their fair values on December 31, 2018 (for further detail by category, please refer to the accompanying Portfolio of Investments):

(\$000s)	Level 1	Level 2	Level 3	Total Value
Assets				
Common Stocks	\$ 1,630,689	\$ 718,282	\$ 1,137	\$ 2,350,108

<sup>1</sup>Includes Corporate Bonds, Bank Loans, Asset-Backed Securities, Non-U.S. Government Mortgage-Backed Securities, U.S. Government & Agency Mortgage-Backed Securities, U.S. Government Agency Obligations (Excluding Mortgage-Backed), Foreign Government Obligations & Municipalities, Municipal Securities.

There were no material transfers between Levels 1 and 2 during the year ended December 31, 2018.

Following is a reconciliation of the fund's Level 3 holdings for the year ended December 31, 2018. Gain (loss) reflects both realized and change in unrealized gain/ loss on Level 3 holdings during the period, if any, and is included on the accompanying Statement of Operations. The change in unrealized gain/loss on Level 3 instruments held at December 31, 2018, totaled \$0 for the year ended December 31, 2018.

Common Stocks	\$ _	\$ _	\$ 1,137	\$ 1,137

## **NOTE 3 - DERIVATIVE INSTRUMENTS**

During the year ended December 31, 2018, the fund invested in derivative instruments. As defined by GAAP, a derivative is a financial instrument whose value is derived from an underlying security price, foreign exchange rate, interest rate, index of prices or rates, or other variable; it requires little or no initial investment and permits or requires net settlement. The fund invests in derivatives only if the expected risks and rewards are consistent with its investment objectives, policies, and overall risk profile, as described in its prospectus and Statement of Additional Information. The fund may use derivatives for a variety of purposes, such as seeking to hedge against declines in principal value, increase yield, invest in an asset with greater efficiency and at a lower cost than is possible through direct investment, to enhance return, or to adjust credit exposure. The risks associated with the use of derivatives are different from, and potentially much greater than, the risks associated with investing directly in the instruments on which the derivatives are based. The fund at all times maintains sufficient cash reserves, liquid assets, or other SEC-permitted asset types to cover its settlement obligations under open derivative contracts.

The fund values its derivatives at fair value and recognizes changes in fair value currently in its results of operations. Accordingly, the fund does not follow hedge accounting, even for derivatives employed as economic hedges. Generally, the fund accounts for its derivatives on a gross basis. It does not offset the fair value of derivative liabilities against the fair value of derivative assets on its financial statements, nor does it offset the fair value of derivative instruments against the right to reclaim or obligation to return collateral. As of December 31, 2018, the fund held interest rate futures with cumulative unrealized gain of \$10,000 and cumulative unrealized loss of \$55,000; the value reflected on the accompanying Statement of Assets and Liabilities is the related unsettled variation margin. Additionally, the amount of gains and losses on derivative instruments recognized in fund earnings during the year ended December 31, 2018, and the related location on the accompanying Statement of Operations is summarized in the following table by primary underlying risk exposure:

(\$000s)	Location of Gain (Loss) on Statement of Operations						
	Sec	urities^		Options Written		Futures	Total
Realized Gain (Loss)							
Interest rate derivatives	\$	(52)	\$	(205)	\$	78	\$ (179)
Credit derivatives		(169)		336		_	167
Equity derivatives		_		-		(33)	 (33)
Total	\$	(221)	\$	131	\$	45	\$ (45)
Change in Unrealized Gain (Loss)							
Interest rate derivatives	\$	_	\$	_	\$	(90)	\$ (90)
Credit derivatives		82		(196)		_	(114)
Equity derivatives		_		_		(99)	 (99)
Total	\$	82	\$	(196)	\$	(189)	\$ (303)

^Options purchased are reported as securities.

**Counterparty Risk and Collateral** The fund invests in exchange-traded or centrally cleared derivative contracts, such as futures, exchange-traded options, and centrally cleared swaps. Counterparty risk on such derivatives is minimal because the clearinghouse provides protection against counterparty defaults. For futures and centrally cleared swaps, the fund is required to deposit collateral in an amount specified by the clearinghouse and the clearing firm (margin requirement), and the margin requirement must be maintained over the life of the contract. Each clearinghouse and clearing firm, in its sole discretion, may adjust the margin requirements applicable to the fund.

Collateral may be in the form of cash or debt securities issued by the U.S. government or related agencies. Cash posted by the fund is reflected as cash deposits in the accompanying financial statements and generally is restricted from withdrawal by the fund; securities posted by the fund are so noted in the accompanying Portfolio of Investments; both remain in the fund's assets. While typically not sold in the same manner as equity or fixed income securities, exchange-traded or centrally cleared derivatives may be closed out only on the exchange or clearinghouse where the contracts were traded. This ability is subject to the liquidity of underlying positions. As of December 31, 2018, securities valued at \$72,000 had been posted by the fund for exchange-traded and/or centrally cleared derivatives.

**Futures Contracts** The fund is subject to interest rate risk and equity price risk in the normal course of pursuing its investment objectives and uses futures contracts to help manage such risks. The fund may enter into futures contracts to manage exposure to interest rate and yield curve movements, security prices, foreign currencies, credit quality, and mortgage prepayments; as an efficient means of adjusting exposure to all or part of a target market; to enhance income; as a cash management tool; or to adjust portfolio duration and credit exposure. A futures contract provides for the future sale by one party and purchase by another of a specified amount of a specific underlying financial instrument at an agreed upon price, date, time, and place. The fund currently invests only in exchange-traded futures, which generally are standardized as to maturity date, underlying financial instrument, and other contract terms. Payments are made or received by the fund each day to settle daily fluctuations in the value of the contract (variation margin), which reflect changes in the value of the underlying financial instrument. Variation margin is recorded as unrealized gain or loss until the contract is closed. The value of a futures contract included in net assets is the amount of unsettled variation margin; net variation margin receivable is reflected as an asset and net variation margin payable is reflected as a liability on the accompanying Statement of Assets and Liabilities. Risks related to the use of futures contracts include possible illiquidity of the futures markets, contract prices that can be highly volatile and imperfectly correlated to movements in hedged security values and/or interest rates, and potential losses in excess of the fund's initial investment. During the year ended December 31, 2018, the volume of the fund's activity in futures, based on underlying notional amounts, was generally between 0% and 2% of net assets.

**Options** The fund is subject to interest rate risk and credit risk in the normal course of pursuing its investment objectives and uses options to help manage such risks. The fund may use options to manage exposure to security prices, interest rates, foreign currencies, and credit quality; as an efficient means of adjusting exposure to all or a part of a target market; to enhance income; as a cash management tool; or to adjust credit exposure. Options are included in net assets at fair value, options purchased are included in Investments in Securities, and Options written are separately reflected as a liability on the accompanying Statement of Assets and Liabilities. Premiums on unexercised,

expired options are recorded as realized gains or losses; premiums on exercised options are recorded as an adjustment to the proceeds from the sale or cost of the purchase. The difference between the premium and the amount received or paid in a closing transaction is also treated as realized gain or loss. In return for a premium paid, call and put options on futures give the holder the right, but not the obligation, to purchase or sell, respectively, a position in a particular futures contract at a specified exercise price. In return for a premium paid, options on swaps give the holder the right, but not the obligation, to enter a specified swap contract on predefined terms. The exercise price of an option on a credit default swap is stated in terms of a specified spread that represents the cost of credit protection on the reference asset, including both the upfront premium to open the position and future periodic payments. The exercise price of an interest rate swap is stated in terms of a fixed interest rate; generally, there is no upfront payment to open the position. Risks related to the use of options include possible illiquidity of the options markets; trading restrictions imposed by an exchange or counterparty; movements in the underlying asset values and interest rates and credit ratings; and, for Options written, potential losses in excess of the fund's initial investment. During the year ended December 31, 2018, the volume of the fund's activity in options, based on underlying notional amounts, was generally between 0% and 12% of net assets.

#### **NOTE 4 - OTHER INVESTMENT TRANSACTIONS**

Consistent with its investment objective, the fund engages in the following practices to manage exposure to certain risks and/or to enhance performance. The investment objective, policies, program, and risk factors of the fund are described more fully in the fund's prospectus and Statement of Additional Information.

**Restricted Securities** The fund may invest in securities that are subject to legal or contractual restrictions on resale. Prompt sale of such securities at an acceptable price may be difficult and may involve substantial delays and additional costs.

**Collateralized Loan Obligations** The fund may invest in collateralized loan obligations (CLOs) which are entities backed by a diversified pool of syndicated bank loans. The cash flows of the CLO can be split into multiple segments, called "tranches" or "classes", which will vary in risk profile and yield. The riskiest segments, which are the subordinate or "equity" tranches, bear the greatest risk of loss from defaults in the underlying assets of the CLO and serve to protect the other, more senior, tranches. Senior tranches will typically have higher credit ratings and lower yields than the securities underlying the CLO. Despite the protection from the more junior tranches, senior tranches can experience substantial losses.

**TBA Purchase, Sale Commitments and Forward Settling Mortgage Obligations** The fund may enter into to-be-announced (TBA) purchase or sale commitments (collectively, TBA transactions), pursuant to which it agrees to purchase or sell, respectively, mortgage-backed securities for a fixed unit price, with payment and delivery at a scheduled future date beyond the customary settlement period for such securities. With TBA transactions, the particular securities to be received or delivered by the fund are not identified at the trade date; however, the securities must meet specified terms, including issuer, rate, and mortgage term, and be within industry-accepted "good delivery" standards. The fund may enter into TBA transactions with the intention of taking possession of or relinquishing the underlying securities, may elect to extend the settlement by "rolling" the transaction, and/or may use TBA transactions to gain or reduce interim exposure to underlying securities. Until settlement, the fund maintains liquid assets sufficient to settle its commitment to purchase a TBA or, in the case of a sale commitment, the fund maintains an entitlement to the security to be sold.

To mitigate counterparty risk, the fund has entered into Master Securities Forward Transaction Agreements with counterparties that provide for collateral and the right to offset amounts due to or from those counterparties under specified conditions. Subject to minimum transfer amounts, collateral requirements are determined and transfers made based on the net aggregate unrealized gain or loss on all TBA commitments and other forward settling mortgage obligations with a particular counterparty (collectively, MSFTA Transactions). At any time, the fund's risk of loss from a particular counterparty related to its MSFTA Transactions is the aggregate unrealized gain on appreciated MSFTA Transactions in excess of unrealized loss on depreciated MSFTA Transactions and collateral received, if any, from such counterparty. As of December 31, 2018, no collateral was pledged by the fund or counterparties for MSFTA Transactions.

**Bank Loans** The fund may invest in bank loans, which represent an interest in amounts owed by a borrower to a syndicate of lenders. Bank loans are generally noninvestment grade and often involve borrowers whose financial condition is highly leveraged. Bank loans may be in the form of either assignments or participations. A loan assignment transfers all legal, beneficial, and economic rights to the buyer, and transfer typically requires consent of both the borrower and agent. In contrast, a loan participation generally entitles the buyer to receive the cash flows from principal, interest, and any fee payments on a portion of a loan; however, the seller continues to hold legal title to that portion of the loan. As a result, the buyer of a loan participation generally has no direct recourse against the borrower and is exposed to credit risk of both the borrower and seller of the participation. Bank loans often have extended settlement periods, generally may be repaid at any time at the option of the borrower, and may require additional principal to be funded at the borrowers' discretion at a later date (e.g. unfunded commitments and revolving debt instruments). Until settlement, the fund maintains liquid assets sufficient to settle its unfunded loan commitments. The fund reflects both the funded portion of a bank loan as well as its unfunded commitment in the Portfolio of Investments. However, if a credit agreement provides no initial funding of a tranche and funding of the full commitment at a future date(s) is at the borrower's discretion and considered uncertain, a loan is reflected in the Portfolio of Investments only if, and only to the extent that, the fund has actually settled a funding commitment.

Securities Lending The fund may lend its securities to approved borrowers to earn additional income. Its securities lending activities are administered by a lending agent in accordance with a securities lending agreement. Security loans generally do not have stated maturity dates, and the fund may recall a security at any time. The fund receives collateral in the form of cash or U.S. government securities. Collateral is maintained over the life of the loan in an amount not less than the value of loaned securities; any additional collateral required due to changes in security values is delivered to the fund the next business day. Cash collateral is invested in accordance with investment guidelines approved by fund management. Additionally, the lending agent indemnifies the fund against losses resulting from borrower default. Although risk is mitigated by the collateral and indemnification, the fund could experience a delay in recovering its securities and a possible loss of income or value if the borrower fails to return the securities, collateral investments decline in value, and the lending agent fails to perform. Securities lending revenue consists of earnings on invested collateral and borrowing fees, net of any rebates to the borrower, compensation to the lending agent, and other administrative costs. In accordance with GAAP, investments made with cash collateral are reflected in the accompanying financial statements, but collateral received in the form of securities is not. At December 31, 2018, the value of loaned securities was \$17,657,000; the value of cash collateral and related investments was \$18,260,000.

**Mortgage-Backed Securities** The fund may invest in mortgage-backed securities (MBS or pass-through certificates) that represent an interest in a pool of specific underlying mortgage loans and entitle the fund to the periodic payments of principal and interest from those mortgages. MBS may be issued by government agencies or corporations, or private issuers. Most MBS issued by government agencies are guaranteed; however, the degree of protection differs based on the issuer. MBS are sensitive to changes in economic conditions that affect the rate of prepayments and defaults on the underlying mortgages; accordingly, the value, income, and related cash flows from MBS may be more volatile than other debt instruments.

**Other** Purchases and sales of portfolio securities other than short-term and U.S. government securities aggregated \$1,673,786,000 and \$1,526,937,000, respectively, for the year ended December 31, 2018. Purchases and sales of U.S. government securities aggregated \$1,137,200,000 and \$1,203,748,000, respectively, for the year ended December 31, 2018.

#### **NOTE 5 - FEDERAL INCOME TAXES**

No provision for federal income taxes is required since the fund intends to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code and distribute to shareholders all of its taxable income and gains. Distributions determined in accordance with federal income tax regulations may differ in amount or character from net investment income and realized gains for financial reporting purposes. Financial reporting records are adjusted for permanent book/tax differences to reflect tax character but are not adjusted for temporary differences.

The fund files U.S. federal, state, and local tax returns as required. The fund's tax returns are subject to examination by the relevant tax authorities until expiration of the applicable statute of limitations, which is generally three years after the filing of the tax return but which can be extended to six years in certain circumstances. Tax returns for open years have incorporated no uncertain tax positions that require a provision for income taxes.

Reclassifications to paid-in capital relate primarily to a tax practice that treats a portion of the proceeds from each redemption of capital shares as a distribution of taxable net investment income or realized capital gain. Reclassifications between income and gain relate primarily to the character of paydown gains and losses on asset-backed securities. For the year ended December 31, 2018, the following reclassifications were recorded to reflect tax character (there was no impact on results of operations or net assets):

(\$000s)	
Undistributed net investment income	\$ 1,613
Undistributed net realized gain	(26,237)
Paid-in Capital	24,624

Distributions during the years ended December 31, 2018 and December 31, 2017, were characterized for tax purposes as follows:

(\$000s)

		Decemb	er 31	
	:	2018		2017
Ordinary income	\$	87,814	\$	85,059
Long-term capital gain		214,104		167,963
Total distributions	\$	301,918	\$	253,022

At December 31, 2018, the tax-basis cost of investments, including derivatives, and components of net assets were as follows:

(\$000s)	
Cost of investments	\$ 3,174,821
Unrealized appreciation	\$ 805,456
Unrealized depreciation	(158,519)
Net unrealized appreciation (depreciation)	646,937
Undistributed ordinary income	6,682
Undistributed long-term capital gain	5,556
Late-year ordinary loss deferrals	(414)
Paid-in capital	 3,154,281
Net assets	\$ 3,813,042

The difference between book-basis and tax-basis net unrealized appreciation (depreciation) is attributable to the deferral of losses from wash sales for tax purposes. In accordance with federal tax laws applicable to investment companies, net specified losses realized between November 1 and December 31 are not recognized for tax purposes until the subsequent year (late-year ordinary loss deferrals); however, such losses are recognized for financial reporting purposes in the year realized.

#### **NOTE 6 - RELATED PARTY TRANSACTIONS**

The fund is managed by T. Rowe Price Associates, Inc. (Price Associates), a wholly owned subsidiary of T. Rowe Price Group, Inc. (Price Group). The investment management agreement between the fund and Price Associates provides for an annual investment management fee, which is computed daily and paid monthly. The fee consists of an individual fund fee, equal to 0.15% of the fund's average daily net assets, and a group fee. The group fee rate is calculated based on the combined net assets of certain mutual funds sponsored by Price Associates (the group) applied to a graduated fee schedule, with rates ranging from 0.48% for the first \$1 billion of assets to 0.265% for assets in excess of \$650 billion. The fund's group fee is determined by applying the group fee rate to the fund's average daily net assets. At December 31, 2018, the effective annual group fee rate was 0.29%.

The I Class is subject to an operating expense limitation (I Class limit) pursuant to which Price Associates is contractually required to pay all operating expenses of the I Class, excluding management fees, interest, expenses related to borrowings, taxes, brokerage, and other non-recurring expenses permitted by the investment management agreement, to the extent such operating expenses, on an annualized basis, exceed the I Class limit. This agreement will continue through the limitation date indicated in the table below, and may be renewed, revised, or revoked only with approval of the fund's Board. The I Class is required to repay Price Associates for expenses previously paid to the extent the class's net assets grow or expenses decline sufficiently to allow repayment without causing the class's operating expenses (after the repayment is taken into account) to exceed both: (1) the I Class limit in place at the time such amounts were paid; and (2) the current I Class limit. However, no repayment will be made more than three years after the date of a payment or waiver.

	Investor Class	I Class
Expense limitation/I Class limit	N/A	0.05%
Limitation date	N/A	April 30, 2020

In addition, the fund has entered into service agreements with Price Associates and two wholly owned subsidiaries of Price Associates, each an affiliate of the fund (collectively, Price). Price Associates provides certain accounting and administrative services to the fund. T. Rowe Price Services, Inc., provides shareholder and administrative services in its capacity as the fund's transfer and dividend-disbursing agent. T. Rowe Price Retirement Plan Services, Inc., provides subaccounting and recordkeeping services for certain retirement accounts invested in the Investor Class. For the year ended December 31, 2018, expenses incurred pursuant to these service agreements were \$79,000 for Price Associates; \$1,179,000 for T. Rowe Price Services, Inc.; and \$1,636,000 for T. Rowe Price Retirement Plan Services, Inc. All amounts due to and due from Price, exclusive of investment management fees payable, are presented net on the accompanying Statement of Assets and Liabilities.

The fund may invest its cash reserves in certain open-end management investment companies managed by Price Associates and considered affiliates of the fund: the T. Rowe Price Government Reserve Fund or the T. Rowe Price Treasury Reserve Fund, organized as money market funds, or the T. Rowe Price Short-Term Fund, a short-term bond fund (collectively, the Price Reserve Funds). The Price Reserve Funds are offered as shortterm investment options to mutual funds, trusts, and other accounts managed by Price Associates or its affiliates and are not available for direct purchase by members of the public. Cash collateral from securities lending is invested in the T. Rowe Price Short-Term Fund. The Price Reserve Funds pay no investment management fees.

The fund may also invest in certain other T. Rowe Price funds (Price Funds) as a means of gaining efficient and cost-effective exposure to certain markets. The fund does not invest for the purpose of exercising management or control; however, investments by the fund may represent a significant portion of an underlying Price Fund's net assets. Each underlying Price Fund is an open-end management investment company managed by Price Associates and is considered an affiliate of the fund. To ensure that the fund does not incur duplicate management fees (paid by the underlying Price Fund(s) and the fund), Price Associates has agreed to permanently waive a portion of its management fee charged to the fund in an amount sufficient to fully offset that portion of management

fees paid by each underlying Price Fund related to the fund's investment therein. Annual management fee rates and amounts waived related to investments in the underlying Price Fund(s) for the year ended December 31, 2018, are as follows:

(\$000s)	Effective Management Fee Rate		Management Fee Waived
T. Rowe Price Inflation Protected Bond Fund - I Class	0.17%		17
T. Rowe Price Institutional High Yield Fund	0.50		671
T. Rowe Price Institutional Large-Cap Core Growth Fund	0.55		34
T. Rowe Price Institutional U.S. Structured Research Fund	0.50		31
T. Rowe Price Limited Duration Inflation Focused Bond Fund - I Class	0.25		3
T. Rowe Price Overseas Stock Fund - I Class	0.64		56
T. Rowe Price Real Assets Fund - I Class	0.64		370
T. Rowe Price U.S. Bond Enhanced Index Fund	0.30		43
T. Rowe Price Value Fund - I Class	0.63	••••••••••••••••••••••••••••••••••••••	38
Total Management Fees Waived		\$	1,263

The fund may participate in securities purchase and sale transactions with other funds or accounts advised by Price Associates (cross trades), in accordance with procedures adopted by the fund's Board and Securities and Exchange Commission rules, which require, among other things, that such purchase and sale cross trades be effected at the independent current market price of the security. During the year ended December 31, 2018, the aggregate value of purchases and sales cross trades with other funds or accounts advised by Price Associates was less than 1% of the fund's net assets as of December 31, 2018.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

## To the Board of Directors and Shareholders of T. Rowe Price Balanced Fund, Inc.

#### **Opinion on the Financial Statements**

We have audited the accompanying statement of assets and liabilities, including the portfolio of investments, of T. Rowe Price Balanced Fund, Inc. (the "Fund") as of December 31, 2018, the related statement of operations for the year ended December 31, 2018, the statement of changes in net assets for each of the two years in the period ended December 31, 2018, including the related notes, and the financial highlights for each of the periods indicated therein (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of December 31, 2018, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period ended December 31, 2018 and the financial highlights for each of the periods indicated therein, in conformity with accounting principles generally accepted in the United States of America.

#### **Basis for Opinion**

These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

# REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM (CONTINUED)

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2018 by correspondence with the custodians, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

PricewaterhouseCoopers LLP Baltimore, Maryland February 15, 2019

We have served as the auditor of one or more investment companies in the T. Rowe Price group of investment companies since 1973.

#### TAX INFORMATION (UNAUDITED) FOR THE TAX YEAR ENDED 12/31/18

We are providing this information as required by the Internal Revenue Code. The amounts shown may differ from those elsewhere in this report because of differences between tax and financial reporting requirements.

The fund's distributions to shareholders included:

- \$3,536,000 from short-term capital gains
- \$238,536,000 from long-term capital gains, (subject to a long-term capital gains tax rate of not greater than 20%)

For taxable non-corporate shareholders, \$51,796,000 of the fund's income represents qualified dividend income subject to a long-term capital gains tax rate of not greater than 20%.

For corporate shareholders, \$27,132,000 of the fund's income qualifies for the dividends-received deduction.

# INFORMATION ON PROXY VOTING POLICIES, PROCEDURES, AND RECORDS

A description of the policies and procedures used by T. Rowe Price funds and portfolios to determine how to vote proxies relating to portfolio securities is available in each fund's Statement of Additional Information. You may request this document by calling 1-800-225-5132 or by accessing the SEC's website, sec.gov.

The description of our proxy voting policies and procedures is also available on our corporate website. To access it, please visit the following Web page:

https://www3.troweprice.com/usis/corporate/en/utility/policies.html

Scroll down to the section near the bottom of the page that says, "Proxy Voting Policies." Click on the Proxy Voting Policies link in the shaded box.

Each fund's most recent annual proxy voting record is available on our website and through the SEC's website. To access it through T. Rowe Price, visit the website location shown above, and scroll down to the section near the bottom of the page that says, "Proxy Voting Records." Click on the Proxy Voting Records link in the shaded box.

#### HOW TO OBTAIN QUARTERLY PORTFOLIO HOLDINGS

Effective for reporting periods on or after March 1, 2019, the fund files a complete schedule of portfolio holdings with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. Prior to March 1, 2019, the fund filed a complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The fund's Forms N-PORT and N-Q are available electronically on the SEC's website (sec.gov).

## ABOUT THE FUND'S DIRECTORS AND OFFICERS

Your fund is overseen by a Board of Directors (Board) that meets regularly to review a wide variety of matters affecting or potentially affecting the fund, including performance, investment programs, compliance matters, advisory fees and expenses, service providers, and business and regulatory affairs. The Board elects the fund's officers, who are listed in the final table. At least 75% of the Board's members are independent of the Boards of T. Rowe Price Associates, Inc. (T. Rowe Price), and its affiliates; "inside" or "interested" directors are employees or officers of T. Rowe Price. The business address of each director and officer is 100 East Pratt Street, Baltimore, Maryland 21202. The Statement of Additional Information includes additional information about the fund directors and is available without charge by calling a T. Rowe Price representative at 1-800-638-5660.
